

Alley Dock

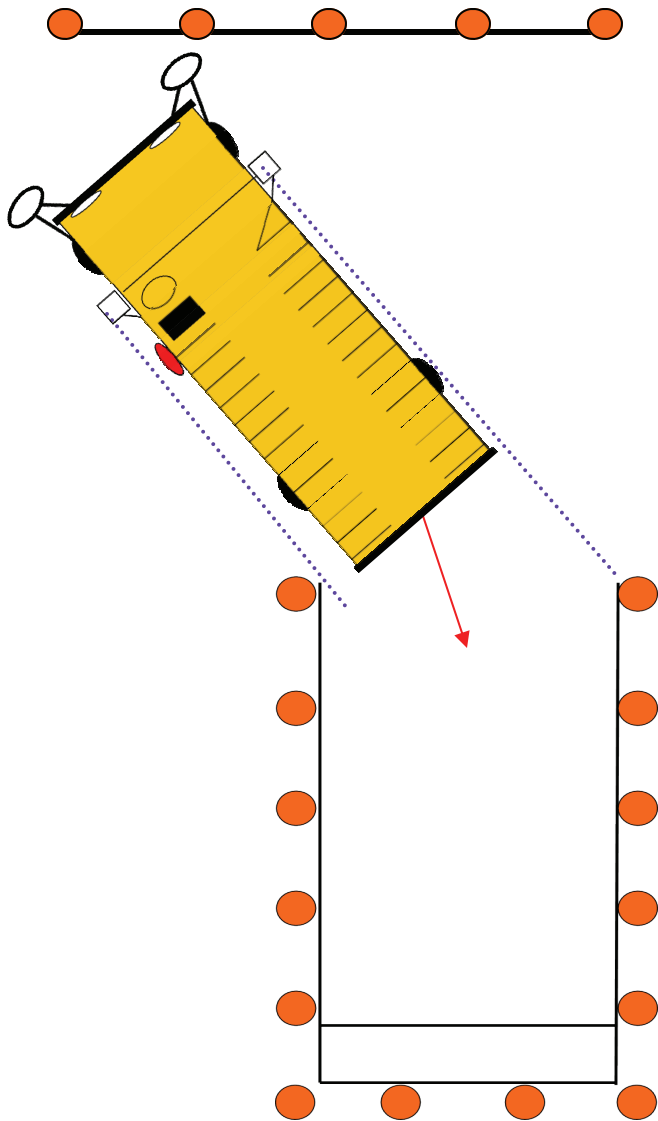

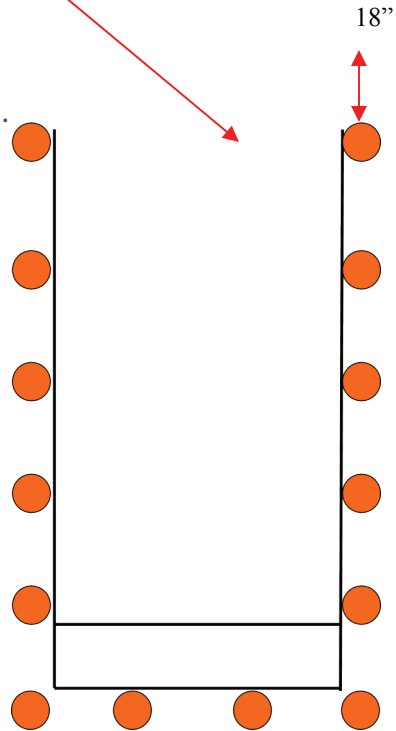

Exercise Boundary

(* This represents a street curb—50 feet from first cone)

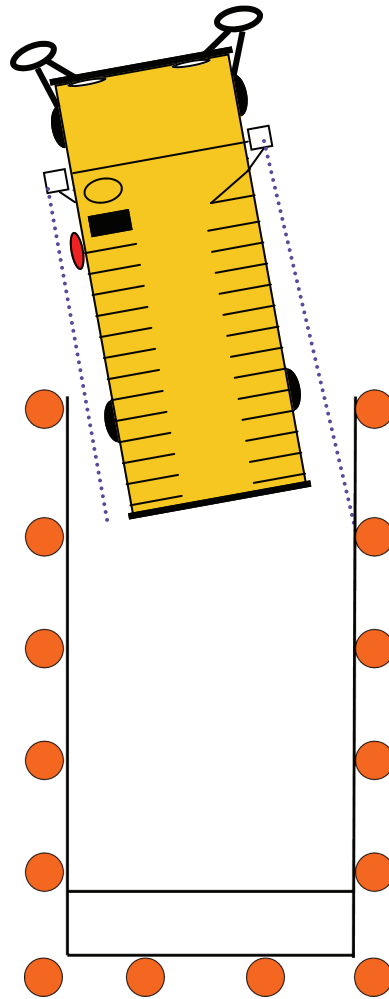

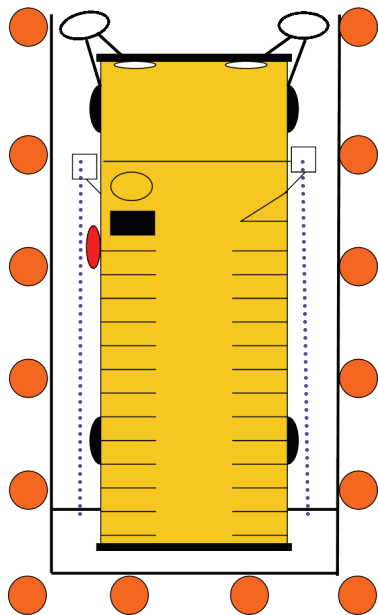

Position the bus so you are parallel to the entrance off set 18". Drive past the alley dock and toward forward boundary. Stop parallel to boundary line no closer than 2 feet.

Begin backing. Turn the steering wheel hard left until all of the cones are seen in the right mirror.

Straighten your wheels and back up. Turn slightly left or right as needed to position the bus between the cones.

Back up until the bumper is positioned in the rear box by using your reference point. When finished set the park brake and sound the horn.
